## Treatment Plan

### Choose communication goals

*Improve picture identification*  
*Improve expressive communication using Lingraphica*

### Personalize and set up pre-made phrases

*Ask family member to complete the Personal Interest Form*  
*Customize icons with family member names, places, etc.*  
*Set up Personal Needs page – going out, relaxing at home, restaurant, etc.*  
*Set up Medical Needs page – personal health care, medications, doctor, etc.*  
*Create Phrase strips of commonly used phrases.*

### Personalize and set up Favorites

*Refer to the completed Personal Interest Form*  
*Add icons that are relevant to the patient's interest and needs*

### Personalize and choose Practice Materials

*Carrier Phrases, Categorization, Phrase Completion, Questions*  
*Patient will practice repeating key words, such as his name, etc.*

**View:** *Transitional User*

**Communication Partners:** *Family, friends and doctor*

**Phrase design:** *One word per icon, short phrases on icons*

**Input method:** *Built in track pad*
